

What's been and what's coming up?

Pharma.Aero is set for the next season!

Pharma.Aero is happy to announce that [the new board](#) has been installed, and that the organization is ready (together with its members) to kick-start new exciting projects and to contribute to different programs around the world. The organization has significantly invested in the back office to set the standards and be able to embrace the ambition of our organization. Next to a full-time administration support, the board has also increased its number of members in order to split responsibilities and to dedicate specific working packages per BOD member. The major tasks that were split over the different board members underline the vision and the mission of our organization. Focus is set on membership, projects, PR and representation of the organization, strategic partnerships, boarding more life science companies, and to professionalize the communication, publications and the back office the organization. It will also help the Secretary General and the back office to increase the speed of the organization. In short, Pharma.Aero invests in the improvement and level-up of the organization.

Pharma.Aero at IATA WCS Singapore and TTWG Montreal, Canada

During the previous World Cargo Symposium of IATA in Singapore, March 2019, mostly members of Pharma.Aero joined the [panel discussion](#) during the Pharmaceutical Track, where the focus was put specifically on the digitalisation of the pharma supply chain and role of the different operators. We welcomed **Nina Heinz** - DHL Global Forwarding, **Eddy Weygaerts** - Pfizer, **Ong Geok Suan** - Singapore Airlines, **Fedor Novikov** - AirBridgeCargo Airlines and **Frank Van Gelder** - Secretary General Pharma.Aero.

Further on Pharma.Aero presented at the [Time & Temperature Working Group](#), in Montreal, Canada, May 2019. Our chairman - **Nathan De Valck** - had the chance to update the TTWG on the status of different projects of the organization and the next projects to come. Many members of the TTWG embraced the developments and the work that has been done by the organization, especially in presenting tangible results of our different projects.

Member in the spotlight!

**Nina Heinz, DHL Global Forwarding
Global Head Network & Quality, Temperature
Management Solutions**

Your Company and position:

DHL Global Forwarding is an industry leader in providing temperature controlled air freight service for the life sciences and healthcare sector, delivering regulatory compliance and higher visibility throughout our international network of GDP-certified life sciences stations.

Your relation to airfreight pharma:

Every year we transport thousands of shipments across our global network. We are part of a team driven by passion and purpose: connecting people and improving lives.

Any interesting developments within your company in relation to airfreight pharma you want to share?

Leveraging data and advanced analytics is the future! Our fully integrated DHL Thermonet data analytics platform for our customers allows them to visualize their cold chain data and drive smart decision-making regarding risk reduction, improved processes and decreased costs. Driving digitalization and supply chain transformation, we help customers harness the right solutions in support of their markets and, ultimately, patients.

What is the added value that Pharma.Aero can bring to the pharma handling in our air cargo industry?

Working together with all parties along the supply-chain in the Global Pharma Tracker project, we strive to provide greater transparency through data sharing and digitization, setting an industry standard for reliability and quality for air-freight transport of temperature-sensitive life sciences products.
