

Pharma Logistics Masterclass 2022

PROGRAM HIGHLIGHTS

- The interactive curriculum builds further on the main takeaways of the previous masterclass and are built around sustainability, disruptive technologies, big data, agility, innovation, digitalization, multimodality, and emergency logistics.
- A week-long series of presentations, debates and practical workshops focused on key challenges for pharma logistics and pharma supply chains.
- An innovative forum for supply chain, pharma and logistics professionals as well as (advanced) master and PhD students to broaden their industry expertise including field visits and informal activities.
- A continuous "Greenlane Pharma Logistics" focus connecting the different technologies and theories to their impact on sustainability
- The Pharma Logistics Masterclass will be offered in a hybrid format: participants can attend on campus, or via livestream.

Do you want to be prepared for any future pharma logistics needs? Do you want to implement the latest scientific insights? Then this is the unique forum and platform. Together with international academics, industry experts and pharma manufactures, you learn to master the competences and technologies needed. By investing in extensive knowledge and learning, your company upgrades and prepares for the future pharma supply chain.
